Krishnapriya Anambalam Subran

Backend PHP Developer | Laravel | REST APIs

Germany | krishnapriyasubran7@gmail.com | LinkedIn | GitHub

Professional Summary

Backend-focused **PHP Developer with around 5 years of professional software development experience**, specializing in REST APIs, Laravel applications, CRM/ERP platforms, backend automation, relational databases, and third-party integrations. Strong hands-on experience with **PHP 8, Laravel, MySQL/MariaDB, RESTful APIs, Git, GitLab, Composer, Docker, PHPUnit, queues, cron jobs, webhooks, authentication, and role-based access control**.
Experienced in designing reusable backend components, developing API-driven applications, optimizing database performance, automating business workflows, troubleshooting production issues, and maintaining code quality through testing and code reviews. Familiar with **Kubernetes fundamentals, CI/CD workflows, Linux environments, microservices concepts, and modern backend architecture**.

Technical Skills

Backend: PHP 8.x, Laravel 8/9/10, OOP, MVC, Eloquent ORM, RESTful APIs, Queues, Cron Jobs, Webhooks

Databases: MySQL, MariaDB, SQL, Relational Database Design, Schema Design, Indexing, Query Optimization, Transactions

Testing / Quality: PHPUnit, API Testing, Functional Testing, Debugging, Code Reviews, SOLID Principles, Clean Code

DevOps / Tools: Docker, Git, GitLab, GitHub, Composer, Linux, CI/CD Concepts, Postman, VS Code

Architecture / Integration: REST APIs, Third-Party APIs, Webhooks, OAuth2, Microservices Concepts, API Security

Frontend: HTML5, CSS3, JavaScript ES6, AJAX, jQuery, Vue.js Basics, Laravel Blade

Additional Knowledge: Kubernetes Fundamentals, Python FastAPI Basics, Node.js Fundamentals, Golang Basics

Professional Experience

Backend Developer **Jul 2023 – Dec 2025**
Competitive Cracker / Pro Team CRM (DRAR) *Ernakulam, India*

- Developed and maintained a production **Laravel-based CRM platform** using PHP 8, Laravel, MySQL, JavaScript, and Vue.js.
- Designed and implemented reusable backend components and **REST APIs** supporting dashboards, CRM workflows, frontend applications, and third-party integrations.
- Implemented webhook-based integration with the **Facebook Graph API** for automated lead collection and processing.
- Built Laravel queues, scheduled jobs, cron tasks, and background processes to automate business workflows.
- Integrated the **Google Sheets API**, reducing manual operational effort by approximately **60%**.
- Developed automated follow-up scheduling functionality, improving customer response handling time by approximately **35%**.
- Implemented WhatsApp-based communication workflows and backend services for customer and group messaging.
- Improved relational database performance through indexing, optimized SQL queries, and efficient data models.
- Implemented authentication, authorization, validation, and role-based access control for secure application functionality.
- Participated in testing, debugging, Git-based workflows, code reviews, requirement analysis, and Agile sprint activities.

PHP Backend Developer **Jan 2023 – Jul 2023**
Levantar Solutions *Ernakulam, India*

- Developed backend modules for an ERP-based vendor management platform using **PHP, Laravel, and MySQL**.
- Implemented vendor onboarding, order management, reporting, and administrative workflows.
- Designed and maintained **RESTful APIs** for frontend applications and external integrations.
- Developed reusable Laravel services and relational database components.
- Optimized SQL queries and backend application logic, improving response time by approximately **30%**.
- Performed debugging, functional testing, application maintenance, and continuous feature enhancements.
- Worked with Git-based development workflows and Agile software development practices.

Software Developer **Jul 2020 – Feb 2022**
Daily Skills *Ernakulam, India*

- Developed and maintained web applications for an online education platform.
- Built backend functionality using PHP, Laravel, WordPress, and MySQL.
- Implemented modules for live classes, quizzes, student management, assessments, and certificate generation.
- Integrated frontend components with backend services and relational databases.
- Performed testing, debugging, application maintenance, and production issue resolution.

Programmer Assistant **Mar 2020 – Jun 2020**
Rajagiri School of Engineering & Technology *Kerala, India*

- Supported the development and maintenance of internal web applications.
- Improved relational database structures and optimized SQL queries.
- Supported authentication and role-based access control functionality.
- Troubleshot application issues and assisted with software testing.

Selected Technical Projects

CRM Automation Platform PHP, Laravel, MySQL, REST APIs

- Developed backend services for lead management, follow-up scheduling, dashboards, and automated messaging.
- Integrated Facebook Graph API, Google Sheets API, webhooks, queues, and scheduled jobs.
- Designed REST endpoints supporting internal interfaces and automated business workflows.

Laravel Backend Application Laravel, PHP, Docker, PHPUnit

- Developed a structured Laravel backend using controller and service separation.
- Implemented request validation, queue-based background processing, caching, database operations, and automated tests.
- Used Docker to create a consistent local development environment.

FastAPI Backend Project Python, FastAPI, REST APIs

- Developed REST-based backend services using Python and FastAPI.
- Practised API validation, modular software architecture, and asynchronous backend concepts.

Education

Master of Computer Applications (MCA) **2017 – 2019**
SNGIST Group of Institutions, APJ Abdul Kalam Technological University *Kerala, India*
Bachelor of Computer Applications (BCA) **2014 – 2017**
Mahatma Gandhi University *Kerala, India*

Languages

English: B2 – Professional working proficiency
German: B1 – Currently improving spoken and professional German
Malayalam: Native

Additional Information

- Currently based in Germany.
- Open to relocation for a suitable backend development opportunity.
- Available to start immediately.
- Interested in backend PHP development, REST APIs, infrastructure automation, scalable systems, and software architecture.
- Comfortable working in Agile development teams and participating in code reviews, testing, and technical discussions.
- Familiar with AI-assisted development tools including GitHub Copilot and ChatGPT.
